Welcome to NVDA!

Most commands for controlling NVDA require you to hold down the NVDA key while pressing other keys. By default, the numpad Insert and main Insert keys may both be used as the NVDA key. You can also configure NVDA to use the CapsLock as the NVDA key. Press NVDA+n at any time to activate the NVDA menu. From this menu, you can configure NVDA, get help and access other NVDA functions.

Options

Keyboard layout: ▾

- Use CapsLock as an NVDA modifier key
- Automatically start NVDA after I log on to Windows
- Show this dialog when NVDA starts

OK
